

An evening of **PERMACULTURE**
with Geoff Lawton
at Franciscan Montessori Earth School to benefit the
Oregon Food Bank Learning Gardens

Where: Franciscan Montessori Earth School Gymnasium
14750 SE Clinton, see www.fmes.org for map

When: Monday, June 4th, 2007

- 5:30pm - **free** taco feed dinner
- 6:00 - Earth School student presentations on school water projects
- 6:30 Geoff Lawton presents on international permaculture projects (one an a half hour presentation and Q/A)

Cost: Free-will donations of cash or canned/dry goods. All cash donations will support the Oregon Food Bank's Learning Gardens

Permaculture is the conscious design of human systems, especially agriculture, to resemble natural systems. It is an old and new approach to our current ecological, energy, and social challenges, and it is part of our growing awareness at the Earth School which we want to share with the whole community.

For an exciting preview of Geoff's work, see the short video "Greening the Desert" (<http://permaculture.org.au/2007/03/01/greening-the-desert-now-on-youtube/>), highlighting a project in the Jordan Valley near the Dead Sea.

Also, see Geoff's web site at www.permaculture.org.au.
